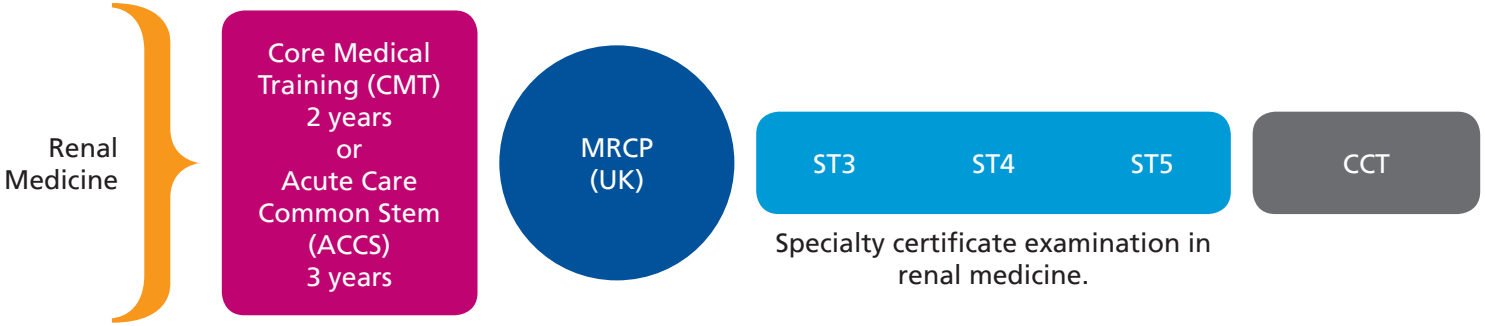
Renal Medicine
Royal College of Physicians

MRCP (UK) - Membership of the College of Physicians
CCT - Certificate of Completion of Training
ST - Specialty Training
CT - Core Training



Most renal trainees dual train in general internal medicine. This extends the training to five years (ST3-ST7).

It is also possible to combine renal medicine with intensive care medicine. This extends the training by a further two and a half years.

This information is correct at the time of writing. Training pathways are subject to change. Further details of training pathways are available from medical royal colleges or faculties.

Prior to starting your specialty training you need to have completed a medical degree followed by the two-year foundation programme or have equivalent competences prior to applying to CT/ST level.
