Physiological sciences

Healthcare science staff who work in the physiological sciences use specialist equipment, advanced technologies and a range of different procedures to evaluate the functioning of different body systems, to diagnose abnormalities, and to direct and in some case, provide therapeutic intervention and long-term management and care.

The work involves direct interaction with patients in a range of areas.

Most healthcare science staff in physiological sciences work in hospital clinics and departments, or as part of a surgical team. Some work in the community, visiting patients in their homes or in schools. Take a look at the roles available:

- audiology [1]
- cardiac sciences [2]
- clinical perfusion? [3]
- critical care science [4]
- gastrointestinal physiology? [5]
- ophthalmic and vision science? [7]
- respiratory physiology and sleep sciences [8]
- urodynamic science [9]
- vascular science [10]
