

Roles in health informatics

If you love working with information technology, enjoy library work, are good at analysing data or find satisfaction in keeping accurate records, there could be a job for you.

Take a look at the range of roles and career opportunities below.

- Clinical informatics

You'll capture, communicate and use data and clinical knowledge to support healthcare professionals.

[1]
- Education and training roles

You'll make sure staff can use the latest technology so they can better deliver patient care.

[2]
- Health records and patient administration

You'll collate, store and retrieve records used in the diagnosis and treatment of patients.

[3]
- Information and communication technology

You'll develop and manage the ICT infrastructure in the NHS including the personal computers, email systems and mobile communications.

[4]
- Information management staff

You'll retrieve, analyse, interpret and present health data and information to help improve patient care.

[5]
- Library, knowledge and information services

You'll make sure crucial evidence and information is available and accessible when and where NHS staff need to use it.

[6]
-

Project and programme management

You'll deliver digital projects that better support patient care in the NHS.
