Roles in health informatics

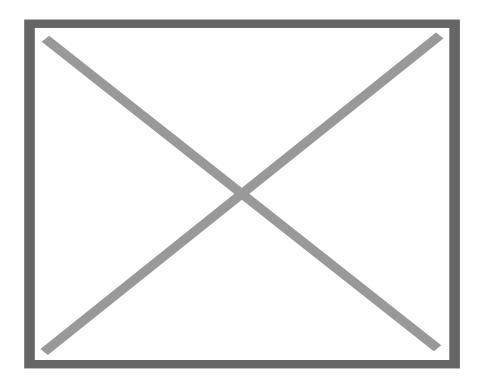

If you love working with information technology, enjoy library work, are good at analysing data or find satisfaction in keeping accurate records, there could be a job for you in health informatics.

Take a look at the range of roles and career opportunities below.

Clinical informatics

You'll capture, communicate and use data and clinical knowledge to support health professionals. You'll also develop and deliver a range of digital tools to support this.

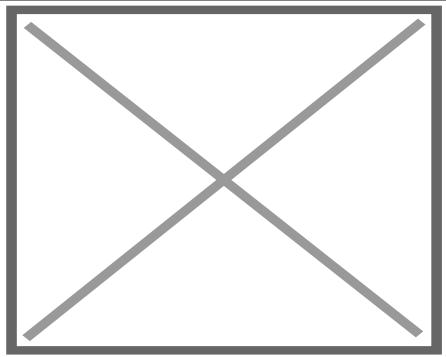

Clinical informatics [1]

• Education and training

You'll be responsible for making sure that NHS staff are able to use the latest technology so they can use digital tools to help patients.

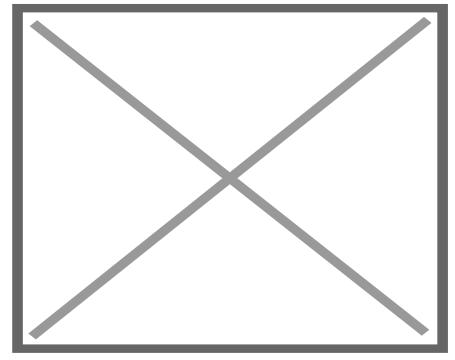

Find about working in health informatics education and training roles [2]

Health records and patient administration

You'll collate, store and retrieve records used in the diagnosis and treatment of patients.

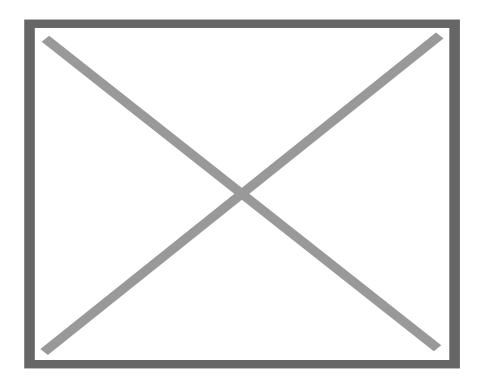

Find out about working in health records and patient administration [3]

Information and communications technology

You'll develop, manage and support the IT and communications infrastructure in the NHS, including computers, email systems and mobile communications.

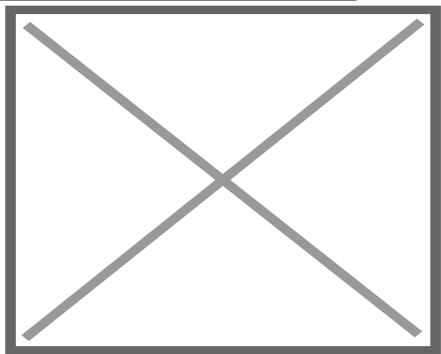

Information and communication technology [4]

Information management

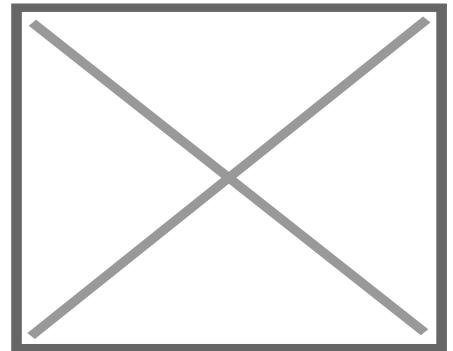

You'll retrieve, analyse, interpret and present health data and information, which enables the planning, improvement and delivery of patient services and care.

Find out about working in information management [5]

• Knowledge and library services

You'll make sure crucial evidence and information is available and accessible when and where NHS staff need to use it.

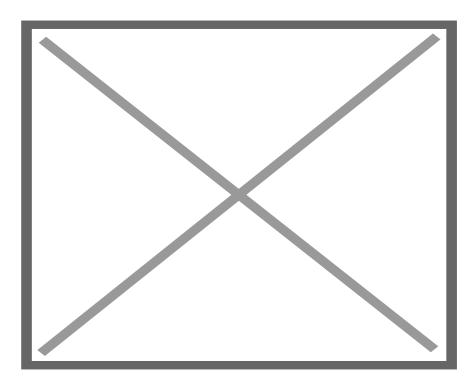

Find out about working in knowledge and library services [6]

Project and programme management

You'll lead digital projects such as delivering digital systems for staff to record, analyse, extract and use data; improving the way information is shared across healthcare organisations or developing a healthcare app.
