

## **Roles in healthcare science**

If you are passionate about technology or science, and about helping others, a career in healthcare science

offers a wide range of opportunities.

## Take a look at the range of opportunities below.

- **Clinical bioinformatics**

You'll be responsible for developing and improving methods for acquiring, storing, and analysing biological data.

[1]

- **Life sciences**

You'll work mainly in laboratories on the prevention, diagnosis and treatment of disease.

[2]

- **Physical sciences and biomedical engineering**

You'll measure what is happening in the body, devise new ways of diagnosing and treating disease and ensure that equipment is functioning safely.

[3]

- **Physiological sciences**

You'll assess different parts of the body to diagnose any abnormalities and sometimes provide treatment and care.
