Roles in healthcare science

If you are passionate about technology or science, and about helping others, a career in healthcare science offers a wide range of opportunities.

Take a look at the range of opportunities below.

Clinical bioinformatics

You'll be responsible for developing and improving methods for acquiring, storing, and analysing biological data.

[1]

• Life sciences

You'll work mainly in laboratories on the prevention, diagnosis and treatment of disease.

[2]

Physical sciences and biomedical engineering

You'll measure what is happening in the body, devise new ways of diagnosing and treating disease and ensure that equipment is functioning safely.

[3]

• Physiological sciences

You'll assess different parts of the body to diagnose any abnormalities and sometimes provide treatment and care.

[4]
