

Physician Associates in general practice - #AssociateYourself

As a physician associate, working in general practice will offer a wealth of opportunities for you to progress in your career.

Working in [primary care](#) ^[1] involves working with GPs and the wider practice team to provide continuity of care for patients, particularly those with long-term conditions.

"I find it very rewarding when I've supported a patient with a mental illness and seen them come out the other side feeling hopeful and stronger than they were." ^[2]

Read Andy's story of being a physician associate in general practice ^[2].

Working life

This role complements that of a GP. You'll have an increasing role to play as part of the diverse multi-skilled practice team, including:

- managing patient lists
- providing health promotion and disease prevention advice for patients
- performing physical examinations
- diagnosing illnesses
- seeing patients with long-term conditions
- undertaking residential, nursing and home visits
- taking medical histories from patients
- analysing test results
- making referrals and
- developing management plans.

Employing physician associates

“The impact of the Physician Associates has been remarkable, it’s changed the way the practice works and runs. It feels as though we are a more cohesive group of people delivering better care.”
