

Compare roles in health

Not sure where to start with the hundreds of NHS careers? Use our compare roles section to get bite-size information on the entry requirements and training, pay and conditions, prospects and skills needed of up to three roles. If there is something that you think you could do, then get more in-depth information on the role.

Don't forget, you can also save your role comparisons by registering with us.

• **Liaison psychiatry** ^[1]

Liaison psychiatrists work at the interface between physical and psychological health, providing psychiatric care to medical patients.

Training and qualifications required

Training usually starts with a five year first degree in medicine and two years of foundation training. You'll then do three years of core training (CT1–3), followed by three years of specialist training (ST4-6). This period of training will include completing your royal college exams. Length of training can vary according to your circumstances.

Expected working hours and salary range

Doctors may work up to 48 hours a week. The working hours may sometimes extend beyond the normal working day to include early mornings, evenings and weekends. You'll first earn a salary when you start your foundation training after medical school. Once you start your specialty training as a liaison psychiatrist employed by the NHS, you can expect to earn a salary of at least £40,257, which can increase to between £84,559 and £114,003 as a consultant.

Desirable skills and values

You'll need empathy and compassion, excellent listening skills and a calm personality. Emotional resilience and initiative to work in challenging situations are also important. You'll also need excellent communication and team working skills along with good problem-solving and decision-making skills using logical/lateral thinking.

Prospects

You could specialise or conduct research in areas such as cures for dementia, teach medical students or postgraduate students in training or get involved in research at universities, the NHS or private sector.

• [Speech and language therapist](#) ^[6]

Speech and language therapy is an exciting and varied career. It offers you the chance to make a difference, a high degree of flexibility and excellent employment prospects. You'll work with patients every day to help improve their care and their lives.

Training and qualifications required

You'll need to study for an approved degree, which takes three or four years full time or up to six years part time, or be employed as a degree apprentice in speech and language therapy with an employer. Full-time university courses in speech and language therapy may have different names, including speech and language pathology and speech science. To get onto an speech and language therapy degree course or degree apprenticeship, you usually need two or three A-levels (or equivalent qualifications), along with five GCSEs (grades A-C), including English language, maths and science. Each institution and employer sets its own entry requirements, so it's important to check carefully.

Expected working hours and salary range

Speech and language therapists in the NHS work standard hours, which are likely to be around 37.5 a week. They usually start at band 5 of the Agenda for Change pay scales. Elsewhere, a speech and language therapist's hours will depend on where they work. They may work evenings and weekends to suit private clients. Some speech and language therapists have to travel between client appointments.

Desirable skills and values

You'll need to enjoy using language and communication to help people, be able to motivate and reassure people, excellent communication and organisation skills and the ability to explain treatment to patients.

Prospects

You may choose to specialise in a particular area of practice such as stammering, cleft palate or learning disability. Other options include teaching or research. You could also move into management, either within speech and language therapy services or general management. As head of a local speech and language therapy service you would be responsible for a team of staff and for managing a budget. Some speech and language therapists set up their own practice, on their own or with other professionals. They take on private clients, sometimes alongside NHS work.
