

Compare roles in health

Not sure where to start with the hundreds of NHS careers? Use our compare roles section to get bite-size information on the entry requirements and training, pay and conditions, prospects and skills needed of up to three roles. If there is something that you think you could do, then get more in-depth information on the role.

Don't forget, you can also save your role comparisons by registering with us.

• **Rheumatology** ^[1]

Rheumatologists are doctors who diagnose and manage chronic inflammatory conditions such as rheumatoid arthritis. Rheumatic conditions can affect people at any age.

Training and qualifications required

Training usually starts with a five year first degree in medicine. 2 year foundation doctor training, 2 year core medical training and 5 year specialist training (ST3-7). This period of training will include your royal college exams. Length of training can vary according to your circumstances.

Expected working hours and salary range

Doctors may work up to 48 hours a week. The working hours may sometimes extend beyond the normal working day to include early mornings, evenings and weekends. You'll first earn a salary when you start your foundation training after medical school. The basic salary ranges from £29,384 to £34,012. Once you start your specialty training as a rheumatologist employed by the NHS, you can expect to earn a salary of at least £40,257, which can increase to between £84,559 and £114,003 as a consultant.

Desirable skills and values

You'll need excellent communication skills to manage a wide range of relationships with colleagues, and patients and their families. You'll be emotionally resilient, have excellent problem-solving and diagnostic skills and work well in teams and under pressure. You'll also be very organised for the benefit of patients.

Prospects

There are approximately 699 rheumatologists working in the NHS in England. In 2020, there were 199 applications for 33 specialty training places.

Related roles

- Immunology [3]
- Rehabilitation medicine [4]
- Sport and exercise medicine [5]

• Forensic psychologist [6]

Forensic psychologists apply psychological theory to criminal investigation to help understand psychological problems associated with criminal behaviour, and the treatment of those who have committed offences.

Training and qualifications required

You'll need an honours degree in psychology to become a member of the Graduate Member of the British Psychological Society which allows you to apply for post graduate courses in forensic psychology.

Expected working hours and salary range

Most jobs in the NHS are covered by the Agenda for Change (AfC) pay scales. After completing their training, forensic psychologists will be paid at band 7. Forensic psychologists in the NHS will usually work standard hours of 37.5 per week. Terms and conditions can vary for employers outside of the NHS.

Desirable skills and values

On a daily basis you will use a broad range of skills, including a thorough knowledge of psychological theory and practice, an interest in how people think and behave and the ability to relate to a wide range of people. You'll need to be a patient, sympathetic and the ability to work on your own and in consultation with others.

Prospects

Some psychologists decide to do into management and lead a team of professionals. You could decide to go into clinical academic research to support the development of the profession. You could also apply for a trainee high intensity therapist position, enabling you to work under the Improving Access to Psychological Therapies initiative.
