

Compare roles in health

Not sure where to start with the hundreds of NHS careers? Use our compare roles section to get bite-size information on the entry requirements and training, pay and conditions, prospects and skills needed of up to three roles. If there is something that you think you could do, then get more in-depth information on the role.

Don't forget, you can also save your role comparisons by registering with us.

Child and adolescent psychotherapist [1]

Child and adolescent psychotherapists (CAPT) work with children and young people aged up to 25 and their families and carers to assess and treat a wide range of psychological problems.

Training and qualifications required

To train as a child and adolescent psychotherapist, you need to complete a recognised pre-clinical course including psychoanalytic and child development theory and psychoanalytic observations of infants and young children. You will also need experience of working with children and adolescents.

Expected working hours and salary range

While you train, you will be paid at Agenda for Change Band 6, moving to a post at Band 7 after qualifying. You could develop to become a highly specialist clinician, consultant or take up teaching and management positions at Band 8a and above.

Desirable skills and values

You'll need a keen awareness of people and their behaviour, be able to relate to a wide range of people, be emotionally resilient and have a capacity for study and continued learning.

Prospects

In addition to community child and adolescent mental health services, you could work in inpatient units, looked after children teams, hospital teams for children with physical illness and disability, eating disorder services, perinatal and parent-infant services, schools, learning disability teams and forensic services. You could progress into a leadership, supervision or teaching role.
