

# Compare roles in health

Not sure where to start with the hundreds of NHS careers? Use our compare roles section to get bite-size information on the entry requirements and training, pay and conditions, prospects and skills needed of up to three roles. If there is something that you think you could do, then get more in-depth information on the role.

Don't forget, you can also save your role comparisons by registering with us.

## • Acute internal medicine <sup>[1]</sup>

Doctors working in acute internal medicine assess, investigate, diagnose and manage patients with conditions that exhibit severe symptoms that develop quickly and may be life-threatening.

### Training and qualifications required

Training usually starts with a five year first degree in medicine, then there's two years foundation doctor training, two years core training (CT1-CT2), followed by 4 years specialists training (ST3-ST6). For dual CCT: there's five years specialist training (ST3-ST7). This period of training will include your royal college exams. Length of training can vary according to your circumstances.

### Expected working hours and salary range

Doctors may work up to 48 hours a week. The working hours may sometimes extend beyond the normal working day including early mornings, evenings and weekends. You'll also need to be on call. The basic salary ranges from £29,384 to £34,012. Once you start your specialty training as a doctor in acute internal medicine employed by the NHS, you can expect to earn a salary of at least £40,257, which can increase to between £84,559 and £114,003 as a consultant.

### Desirable skills and values

You'll need excellent communication skills to manage a wide range of relationships with colleagues, and patients and their families. You'll be emotionally resilient, have excellent problem-solving and diagnostic skills and work well in teams and under pressure. You'll also be very organised for the benefit of patients.

### Prospects

There are approximately 504 doctors working in acute internal medicine in NHS, England. In 2020, there were 510 applications for 94 specialty training posts. You'll need to specialise in a practical procedure such as echocardiography or gain qualifications in management, leadership or education. You'll also have opportunities to get involved in research.
