

Compare roles in health

Not sure where to start with the hundreds of NHS careers? Use our compare roles section to get bite-size information on the entry requirements and training, pay and conditions, prospects and skills needed of up to three roles. If there is something that you think you could do, then get more in-depth information on the role.

Don't forget, you can also save your role comparisons by registering with us.

• Speech and language therapy assistant ^[1]

Speech and language therapy assistants are the frontline of helping patients with conditions that affect their communication, swallowing and feeding. It could also be your first step in becoming a speech and language therapist.

Training and qualifications required

There are no set entry requirements for speech and language therapy assistants. Employers expect good numeracy and literacy and some experience or qualifications in health or social care. Employers may ask for GCSEs in English and maths and may ask for NVQ, BTEC or an equivalent qualification in health and social care. They often ask for relevant work experience. You will be given the training you need to do the job, including an introduction to the department and its procedures. You may be offered the chance to study for qualifications such as the NCFE CACHE level 2 Certificate in Healthcare Support Services or the NCFE CACHE level 3 Diploma in Healthcare Support.

Expected working hours and salary range

Speech and language therapy assistants working in the NHS are paid on the Agenda for Change (AfC) pay system. You would typically start on AfC band 2. With further training and experience, you could apply for positions at band 3 or as an assistant practitioner at band 4. Most speech and language therapy assistants in the NHS work standard hours which are likely to be around 37.5 a week. They may work some evenings or weekends. Terms and conditions will usually be different for speech and language therapy assistants working outside of the NHS.

Desirable skills and values

Speech and language therapists need to be able to work with people of all ages, enjoy using language and communication to help people, be able to motivate people, be able to reassure people and enjoy working alone or as a member of a team. They also need excellent communication skills, the ability to motivate people, organisational skills and the ability to explain treatment to patients.

Prospects

With experience, you could become a team leader supervising the work of other speech and language therapy assistants. You could apply to train as an assistant practitioner or, with the necessary qualifications, as a speech and language therapist.

• [Neurologist](#) ^[6]

Neurologists diagnose, treat and manage conditions affecting the brain and spinal cord, and disorders of the nerves and muscles that activate movement and transmit sensations from around the body to the brain.

Training and qualifications required

Training usually starts with a five year first degree in medicine. You'll then complete two years of foundation training, two years of core training (CT1-2) and four years of specialty training (ST3-6).

Expected working hours and salary range

Doctors may work up to 48 hours a week. The working hours may sometimes extend beyond the normal working day including early mornings, evenings, weekends and on call. The basic salary ranges from £29,384 to £34,012. Once you start your specialty training as a neurologist employed by the NHS, you can expect to earn a salary of at least £40,257, which can increase to between £84,559 and £114,003 as a consultant.

Desirable skills and values

You'll need excellent communication skills to manage a wide range of relationships with colleagues, and patients and their families. You'll be emotionally resilient, have excellent problem-solving and diagnostic skills and work well in teams and under pressure. You'll also be very organised for the benefit of patients.

Prospects

In 2020 there were 207 applications for 50 specialty training places. You could specialise or conduct research in areas such as stroke medicine, epilepsy, multiple sclerosis (MS), sleep medicine or pain management. You could teach medical or postgraduate students or get involved in research.
