Training and development (learning disability nursing)

This page has information on the training and development opportunities in learning disability nursing.

After studying as a learning disability nurse [1], you need to be committed to learning and always keep your skills and knowledge up to date.

Revalidation

To maintain your registration to practise with the Nursing and Midwifery Council, you’ll need to go through the process of revalidation.

The process is straightforward and will help you as a nurse or midwife to demonstrate that you practise safely and effectively. You will have to revalidate every three years to renew your registration.

Find out more about revalidation on the NMC microsite [2]

Development opportunities

After qualifying and gaining some experience, there are a variety of routes you could take as the next step in your career. Some nurses decide to do into management [3] or clinical academic research [4].

Consultant nurse roles are also among the highest paid nurses in the NHS.

You could specialise in a sensory disability such as autism or specific setting such as education. You may also want consider areas outside of nursing in roles such as psychological well-being practitioner [5] or high-intensity therapist [6].

Nurse consultants

As you gain more experience, you might be able to apply for jobs as a nurse consultant. You
would spend a minimum of 50% of your time working directly with patients. You'll also have a number of other roles and responsibilities including:

- developing personal practice
- involvement in research
- contributing to the education, training and development of other nurses

Consultant nurse roles are specialised and posts are created based on the health needs of local communities. They are also among the highest paid nurses in the NHS.

**NHS Leadership Academy**

The NHS Leadership Academy also runs a number of programmes to support nurses into leadership roles including the Mary Seacole programme. They also offer a programme purely for frontline nurses and midwives to help develop their skills and build confidence.

More information on the NHS Leadership Academy and its programmes [7].

**Education and training roles**

Education, training the professional development of the next generation of nurses is vital to delivery of patient care. Nurses can get involved through a number of roles:

- preceptors
- mentors
- practice educators
- lecturers

- Preceptors Expand / Collapse
  Preceptors offer guidance and support to newly qualified nurses. They will be qualified practitioners and normally have experience in the area of practice as the practitioner requiring support.

- Mentors Expand / Collapse
  Mentors or assessors are responsible for a range of activity and learning for student nurses, such as the quality of the learning in a practice setting and the assessment of a student’s competence.

- Practice educators Expand / Collapse
  Practice educators lead the teaching and development in the practical setting rather than the theoretical setting which would be led by a lecturer. The practice educator will provide guidance and support to mentors involved with students and will provide a link between the practice setting and the university.

- Lecturers Expand / Collapse
  The lecturer is responsible for classroom teaching in universities. The role is similar to that of the practice educator in the practice environment and both roles have equal standing.
