Work experience toolkit

Teachers and careers advisers are often involved in arranging and improving work experience programmes for students with the NHS.

Health Education England has produced a toolkit for schools, colleges and further education institutions as part of its widening participation programme.

Download the free toolkit [1] which:

- explains how the NHS works
- dispels some common myths
- provides information and practical tips on how to set up a placement
- manages student expectations
- gives examples of good practice from trusts which are already running successful work experience programmes
- contains template forms to support setting up a work experience programme

- **Work experience toolkits for NHS organisations**

  Health Education England [1] has useful toolkits for NHS organisations looking to set up or improve their work experience programmes, both in person and online.

- **NHS work experience for young people**

Take a look at the Step into the NHS website [2] for information, hints and tips on finding work experience in the NHS.
