Careers in the wider healthcare team

Join the team and make a difference.
Welcome to the NHS

The NHS offers a huge range of exciting and challenging opportunities for people who are passionate about making a difference.

With more than 350 different careers on offer, there is a job for you no matter what your interests, skills or qualifications.

What’s more, you’ll be given every opportunity to build on your skills and learn new ones as part of the Career Framework – a system that demonstrates our commitment to skills development. See pages 10 and 11 for more information about this.

Scientists, accountants, porters, psychologists, nurses, health informaticians and estate managers, to name but a few, are all needed to ensure the smooth running of the NHS. These people, and many more, work together in teams to deliver the very best care for our patients.

To find out more about becoming a member of the NHS team, call 0345 60 60 655, email advice@nhscareers.nhs.uk or visit www.nhscareers.nhs.uk

We look forward to hearing from you!

Foreword

In this booklet, you’ll find out about the different roles in the wider healthcare team, and how they fit into the day-to-day working of the NHS.

You may not realise just what a huge range of opportunities exist in the NHS. We rely on people as diverse as painters, caterers, chaplains, secretaries and engineers.

You might be interested in cutting-edge technology, in providing hospitality, in administration, in estates or in human resources, for example. You may be looking for a high-flying career or a less demanding but still rewarding role. Whatever your situation and strengths, the wider healthcare team has the answer.

If you want to play your part in helping us to look after patients and provide healthcare for the future, you can find a role that is right for you.

We offer a flexible working environment, excellent benefits and a wealth of opportunities to develop your career.

The NHS Careers team

For more information about careers in the wider healthcare team, please visit www.nhscareers.nhs.uk/WHT

If you have any questions, call our helpline on 0345 60 60 655 or email advice@nhscareers.nhs.uk
The NHS – a rewarding place to work

There are very few careers as rewarding as one in the NHS, or that give you the opportunity to work with such a wide variety of people.

We actively recruit people of all ages, backgrounds and levels of experience. This helps us understand the different needs of the patients we serve every day and provide the best possible service.

Whichever area you join, you become part of a talented, passionate team of people committed to providing the best care and treatment to patients. You will also enjoy one of the most competitive and flexible benefits packages offered by any employer in the UK.

Benefits of working in the NHS
Everyone who joins the NHS is guaranteed a salary that matches their ability and responsibilities, and is given every opportunity to increase it through training and development.

On top of your basic salary, you will receive at least 27 days’ holiday each year, plus a range of other benefits, including occupational health and counselling services.

Join one of the UK’s best pension schemes
The NHS Pension Scheme is one of the most generous and comprehensive in the UK. Every new employee automatically becomes a member and you will get an excellent package of pension benefits.

For more information about the pension scheme, and a full list of the benefits included, please visit www.nhscareers.nhs.uk/payandbenefits

PAY AND CONDITIONS

The NHS pay system, known as Agenda for Change, offers real benefits for all directly-employed staff except doctors, dentists and very senior managers including:

- a standard working week of 37.5 hours
- holiday entitlements of 27 days per year, plus eight general and public holidays, rising to 33 days after ten years’ service
- pay enhancements to reward out-of-hours, shift and overtime working
- career and pay progression based on the application of knowledge and skills
- annual personal development review to support career aspirations.

Other benefits of working in the NHS include training, occupational health services, automatic membership of the NHS Pension Scheme (unless you choose to opt out) and study leave for sponsored courses.

To find out more about the different Agenda for Change bands, and see the most up-to-date starting salaries for each one, go to www.nhscareers.nhs.uk/payrates
The NHS is committed to offering learning and development opportunities for all full-time and part-time staff.

No matter where you start within the NHS, you’ll have access to extra training and be given every chance to progress within the organisation.

You will receive an annual personal review and development plan, to support your career progression.

As part of the Knowledge and Skills Framework, within Agenda for Change, you will be encouraged to extend your range of skills and knowledge and take on new responsibilities.

See pages 10 and 11 for more on the Career Framework, and an example of how an employee has progressed through the NHS.
CASE STUDY

Name: Lydia Wager
Job title: income and costing accountancy assistant, Royal Cornwall Hospitals NHS Trust
Entry route: extended diploma in business studies

Lydia loves the team work element of her job, as well as being responsible for her own tasks. She won a Learndirect Award for Intermediate Apprentice of the Year in 2013.

I did a course in business studies, book-keeping and accounts part-time while working as a hotel housekeeper and waitress, and decided a finance career was for me.

I chose the apprenticeship route because I knew it would provide a gateway to an NHS career. It was an amazing opportunity to gain workplace experience, while achieving a qualification and earning a salary.

I was lucky enough to get a management accounts and income clerk apprenticeship at Royal Cornwall Hospital and then a band 2 permanent role in the income and costing team. I was responsible for preparing the monthly accounts and raising invoices, providing administrative support, inputting, retrieving and collecting confidential data.

I’m currently working in a band 4 role, covering a colleague’s maternity leave as income and costing accountancy assistant.

Working in finance, the months come around in a similar routine and everyone in the team has their own monthly tasks. I am responsible for costing the non-Payment by Results data each month, which are the ‘high cost’ elements of a patient’s attendance at the trust. I also prepare data for invoices for care provided to patients from outside Cornwall. In short, most of my job is preparing data so that our commissioners (the people who ‘buy’ services from the trust for their patients) pay us each month!

I love working in a team but working independently on my own tasks is also very fulfilling. Being able to relate my work to helping someone in the hospital is the driving force for me, and I know that, every day, I am developing a successful career at the same time as making a positive difference.

I chose the apprenticeship route because I knew it would provide a gateway to an NHS career.
Helping you find the right work-life balance

The NHS is committed to maintaining a healthy work-life balance for all NHS staff. There is a real focus on specific areas that are designed to make your life easier at certain times during your career. These include:

- flexible working and flexible retirement
- childcare provision and support for carers in the workplace
- coping with stress
- training and development
- tackling discrimination, bullying and harassment.

As well as advice and support for people looking after sick or elderly relatives, we may be able to provide a range of childcare services that are free for all NHS employees, including:

- nursery care
- after-school and breakfast clubs
- holiday play schemes
- emergency care.

Manage your commitments in and out of work

The size and diversity of the NHS means we can offer you a range of flexible working opportunities.

Part-time roles and jobshare opportunities are often available, as well as term-time only, evening and weekend positions. We will do everything we can to help you combine your work for us with commitments in your life outside work – whether you’re studying for a new qualification, raising a family or have other responsibilities.

Many people take an extended break to look after young children or other dependants who need special care, or to study full time.

We will help you combine your work for us with commitments in your life outside work.
Your career in the wider healthcare team

The wider healthcare team offers you a unique range of career options and each role has one thing in common – they are essential to the running of the NHS.

It may be the doctor who carries out the life-saving operation and the nurse whose skills help the patient recover, but, to do their jobs, they rely on back-up from a huge team of other staff. This booklet will help you find out how you can become part of this important team.

Members of our wider healthcare team design, construct and maintain NHS buildings, run the catering, supply the linen, clean the wards, book the appointments and much more. They play a vital part in ensuring that patients receive the best-possible care.

The six main areas
The wider healthcare team is grouped into six main areas:
• administration
• corporate services
• domestic/catering services
• estates
• support services
• clinical support services

There is more information about these in the next section.

Administration
In the NHS, good record-keeping and administration can save lives. Doctors and other healthcare professionals need fast access to patients’ notes to make vital decisions about treatment. If, for example, an unconscious or confused patient is allergic to a particular drug or has a chronic condition such as diabetes, the medical team needs to know.

Administrative staff also have to communicate clearly with patients and outside organisations like social services. Equally, everyone contacting the health service – GPs, patients, relatives and staff – need a first-class response.

Who will it appeal to? Those who are organised and calm under pressure and who take pride in attention to detail. You’ll need a good general education and basic computing skills. Secretaries and receptionists will need keyboard and switchboard skills.

Corporate services
Staff in a variety of key areas deliver the core services on which the whole organisation depends. Some, such as health promotion specialists and chaplains, have direct contact with patients and relatives but more often corporate staff work behind the scenes in areas such as finance, human resources, staff training or procurement. Together they ensure the modern health service provides the kind of care the public expects to receive.

Who will it appeal to? Professionals who are attracted by the idea of using and developing their skills within the NHS. An example would be a finance professional who has the responsibility to provide budgetary analysis, or a human resources (HR) professional who sees the unique mix of staff and groundbreaking employment policies in the NHS as the ideal setting for his or her career.

Further information can be found at www.nhscareers.nhs.uk/WHT
CASE STUDY

Name: Shamima Akhtar

Job title: receptionist/health records, Royal Oldham Hospital

Entry route: A levels

Shamima was offered a full-time role just weeks after starting as a temp. She has received all the support she needs to get used to the busy day surgery unit reception and is now confident and happy that she is making a difference to patients.

I came here on a temporary contract last year and after just a few weeks I was offered a full-time job. I was really pleased because by then I’d settled in and was enjoying it.

I work on the reception desk of the day-surgery unit, answering phones and checking patients in. I take a patient’s details, enter the information on to the system and then I take the patient up to the ward with their notes. It’s quite busy here most of the time – in fact it can get hectic – but there’s a great atmosphere and it’s a really friendly place to work.

I work mainly with the other administration staff but I also deal with doctors and nurses as well as the patients and their relatives, so there’s plenty of variety.

We get a lot of calls from patients about their appointments and at first I was worried I wouldn’t be able to deal with it. But I have had plenty of support and now I feel confident sorting out their queries. It’s nice to know you’ve helped someone.

It’s quite busy here most of the time – in fact it can get hectic – but there’s a great atmosphere and it’s a really friendly place to work.
Domestic/catering services
The experience of patients in hospital depends to a large extent on comfortable, hygienic surroundings, clean linen and nutritious, well-presented food. Some patients are on special diets or have particular cultural requirements. Staff working in these services help make sure that everyone who visits or works in a hospital benefits from good meals and a clean, attractive environment.

Who will it appeal to? Those who enjoy providing hospitality and looking after people’s comfort and wellbeing. It will be a matter of personal pride for you that a patient’s stay in hospital is as comfortable as possible. These roles in the NHS will appeal to you if you have an aptitude for hospitality and an awareness of hygiene and nutritional issues.

Estates staff
Most hospitals today consist of multiple new and old buildings, many within extensive grounds which need ongoing programmes of maintenance. For this, we depend on an estates team doing many different jobs, such as architects, electricians, gardening, painting and maintaining equipment, but all working together. Patients value and enjoy bright, welcoming surroundings and it can have a positive impact on their wellbeing and recovery. Healthcare staff also need the right working environment to provide the best care for patients.

Who will it appeal to? Some roles in NHS estates will attract those who like practical, hands-on work – both skilled and unskilled. Others will attract people who are interested in designing, problem solving and management. All roles will appeal to those who take pride in improving surroundings for patients, staff and visitors. For the more practical roles, you’ll need attention to detail, awareness of safety issues and some technical or design flair. For management roles, you’ll need to be a good leader and have good project management skills.

Support services
Support staff provide essential day-to-day services, often working closely alongside the healthcare team. For example, they move patients, staff and equipment around the hospital site and look after security and car parking. They ensure supplies are available when needed and that surgical instruments are sterilised ready for the operating theatre.

Who will it appeal to? A reassuring manner and confidence in dealing diplomatically with tricky situations are important skills for roles such as security staff, fire safety officers and porters. Drivers and messengers need flexibility, reliability and good driving skills. And sterile services staff need a keen awareness of hygiene issues.

Clinical support services
Clinical support staff work in a huge variety of settings across the NHS. Their role is to assist healthcare professionals, sometimes – but not always – working alongside them. They might be based in a laboratory helping to diagnose different conditions; they might work in a hospital or clinic, or visit patients in their own homes, assisting with treatment or providing general care.

Who will it appeal to? Everyone who has contact with patients, including those working in nursing, midwifery, dentistry and the allied health professions, needs personal qualities such as a caring attitude, reassuring manner and respect for patients’ dignity. Some healthcare science assistants and associates may work with both patients and equipment, so they need an interest in technology and the ability to pay close attention to detail. Others may be purely laboratory-based and need an aptitude for science, accuracy and efficiency.

To find out more about the qualifications needed to work in the wider healthcare team, visit www.nhscareers.nhs.uk/WHTtraining
**CASE STUDY**

**Name:** Lynn Keeling  
**Job title:** catering zone supervisor, Wirral Hospital NHS Trust  
**Entry route:** general catering assistant

Lynn relished the challenge of being promoted from assistant to supervisor at a time of major change. She gets great satisfaction from direct contact with patients and from working with nurses and dietitians.

I’m in charge of 18 staff serving two hot meals a day. I supervise the food service and deal with any queries or problems. I check the food trolleys as they go up to the wards, oversee the cleaning and make sure we’ve got our full stock of cleaning materials, uniforms, cutlery and crockery.

When I was promoted from being a catering assistant, I knew it would be a bit of a challenge but there was no way I was going to turn it down. My new job came about when we moved to a new way of working – we now serve the food ourselves on the wards instead of the nurses. It’s much more hygienic and it saves nurses a lot of time. We had to find our way a bit to see what worked best and it’s turned out brilliantly. I think all of us – managers, supervisors and staff – have done really well.

Our department takes a lot of pressure off the nursing staff. Some patients can be quite demanding about their likes and dislikes and patients on special diets are sometimes not sure what they’re allowed to eat. If I can help out by talking with the patient and then going to talk to the dietitians if necessary, it frees up the nurses to get on with other things. And, of course, it makes my job very interesting and fulfilling.

For me, though, the best part is getting that elderly lady the egg roll that she really wants or some toast for a patient who’s quite ill and just doesn’t fancy anything else.
The Career Framework has been designed to improve career development and job satisfaction for NHS employees. It encourages individuals to learn new skills and take on extra responsibilities that enable them to progress within the organisation. Many people take on additional responsibilities within their own area, while others retrain and move in to different roles.

The case study on Chris Willis (see page 12) describes how he has progressed within the wider healthcare team.

| Patient environment manager | planning and organising maintenance of safe patient environments and equipment |
| Day technician: installing and servicing a range of electrical equipment |
| Craftspeople: maintaining and repairing electrical equipment and repairing other hospital electrical fixtures and fittings |
| Maintenance assistant: with general duties as part of a team to maintain hospital environment and equipment |
Name: Chris Willis
Job title: patient environment manager, Cambridge University Hospitals NHS Foundation Trust
Entry route: joined as a qualified electrician

Chris’s story is a great illustration of the opportunities to progress and work in different areas of the NHS. He has been able to work, gaining several promotions, while studying to improve his prospects even more.

As a qualified electrician, I took the decision to join the NHS as a maintenance assistant because of the excellent career potential on offer. It has turned out to be a great decision!

I had the satisfaction of being promoted twice – to electrical craftsman and then to day technician. I was given all the encouragement and financial support I needed. While I was a day technician, my employer paid for me first to study part time for a BTEC in electrical and electronic engineering and then for an HNC/HND.

I’m now patient environment manager as well as being in the final year of a degree course in electrical engineering. I still work sometimes as an on-call electrical engineer but I also report to the trust’s maintenance and operations managers. I am responsible for making sure the wards are a safe environment for staff and patients.

With the support of the NHS, I have made great progress and I intend to go even further. I could go on to do an MBA in engineering management or choose to join the electrical systems design team or move into project management.

At the moment, I think I’ll probably do the MBA with the aim of becoming an operations or estates manager, but I haven’t quite decided yet. The field is wide open to me.

I took the decision to join the NHS because of the excellent career potential. It has turned out to be a great decision!
What opportunities are available?

This section gives a brief overview of the roles in each of the six main areas of the wider healthcare team.

Administration

<table>
<thead>
<tr>
<th>Type of work</th>
<th>Main responsibilities</th>
</tr>
</thead>
</table>
| Clerks                    | • Clerks are employed throughout the health service. In some clerical roles you will have a lot of contact with patients and relatives, in others none at all. You might work:  
  - in an office, doing general tasks such as filing and photocopying  
  - in a clinic, arranging appointments and checking patients in  
  - on a ward, collating information, helping to admit and discharge patients. |
| Medical record-keepers    | • As the NHS moves from paper to electronic records, medical record-keepers are key to this process. You will look after highly confidential clinical notes. You’ll have to ensure the records are completely secure but at the same time have them readily available to those treating patients. |
| Medical secretaries       | • In this role you will run a GP or consultant’s office, dealing with correspondence, making appointments, handling patients’ queries and liaising with other healthcare staff. You’ll develop familiarity with medical terms. Medical secretaries work on their own much of the time and deal with confidential clinical information. |
| Receptionists             | • As part of the front-line team, the receptionist is the first point of contact for many patients and visitors. You could work in one of many different areas, such as A&E, outpatients or a GP surgery. You might make appointments, check patients in and arrange transport, probably using a computer system. |
| Secretaries/typists       | • Your role will vary, depending on where you are based and how your office is organised. As well as word-processing, you might use computer spreadsheets and databases, deal with post, emails and phone calls, and run a filing system. |
| Switchboard operators/telephonists | • You will be an important first contact for patients and their families, who might be anxious or upset. It may involve being the communications point to alert key staff of any internal emergencies. You will also take urgent calls from GPs and other healthcare staff in the community. |

For more information about roles in administration, please see the relevant factsheet or visit www.nhscareers.nhs.uk/WHT

To search for jobs, visit www.jobs.nhs.uk
## Corporate services

<table>
<thead>
<tr>
<th>Type of work</th>
<th>Main responsibilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chaplains</td>
<td>Chaplains offer spiritual care and emotional support to patients and staff. They usually work in hospital-based teams. Most are Anglicans, but chaplains are recruited from across the faith communities, according to the needs of local people.</td>
</tr>
<tr>
<td>Finance staff</td>
<td>Qualified and unqualified staff are employed in finance departments. At junior levels you might handle invoices or run a payroll system. As a senior staff member you could be involved in financial analysis, planning and reporting, management accounting and negotiations over funding.</td>
</tr>
<tr>
<td>Health education/health promotion specialists</td>
<td>Health promotion specialists are qualified professionals. In this position, you’ll give advice and training on lifestyle and disease prevention to people in the community and to NHS staff. You might run weight-loss clinics and sessions on giving up smoking, for example.</td>
</tr>
<tr>
<td>Hospital play staff</td>
<td>You will be a key member of the team looking after children and young people in hospital. As a member of the hospital play staff you will use play and other activities such as art to help children cope with a hospital stay or undergo a medical procedure. You’ll also have close contact with families, helping to support them through a difficult time.</td>
</tr>
<tr>
<td>Human resources staff</td>
<td>The human resources department deals with everything relating to the employment of staff – everyone from doctors and nurses to librarians and gardeners. You will be involved in recruitment, complaints and grievance procedures and in bringing in new local and national employment policies. An increasingly important part of your job would be to help employees benefit from NHS work-life balance policies. You will work closely with health unions and professional bodies.</td>
</tr>
<tr>
<td>Information technology (IT) and audiovisual technicians</td>
<td>IT is a growing area with technicians supporting the ever increasing technical data required and management systems utilised within the NHS. Audiovisual technicians provide resources for the many teaching areas of the health service and help to stage conferences. You will provide support to service users working with a wide range of technical computer equipment both remotely and face to face.</td>
</tr>
<tr>
<td>Librarians</td>
<td>Library staff provide an essential research and information service for doctors and other health professionals, and for health service managers. As a professionally qualified librarian, you will be responsible for managing the library services, which range from providing training on information resources, to using the internet and new technology to source reference material.</td>
</tr>
<tr>
<td>Training and development staff</td>
<td>You could be involved in running induction programmes for new staff, any internal programmes that may include statutory and mandatory training or the delivery of a range of staff development programmes – all linked to improving patient and staff outcomes.</td>
</tr>
</tbody>
</table>

For more information about roles in corporate services, please see the relevant factsheet or visit [www.nhscareers.nhs.uk/WHT](http://www.nhscareers.nhs.uk/WHT)

To search for jobs, visit [www.jobs.nhs.uk](http://www.jobs.nhs.uk)
## Domestic/catering services

<table>
<thead>
<tr>
<th>Type of work</th>
<th>Main responsibilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Catering managers/ catering assistants</td>
<td>• Hospital catering services offer a variety of jobs at all levels. As a catering assistant, you will deliver meals to wards, serve food and maintain high standards of hygiene in kitchens. More senior roles range from the day-to-day running of catering departments to responsibility for a trust’s entire catering operation.</td>
</tr>
<tr>
<td>Head chefs/chefs/assistant chefs</td>
<td>• Chefs in the NHS are qualified professionals in charge of preparing nutritious and appetising food. Head chefs are in charge of a hospital’s entire kitchen operation, while chefs and assistants carry out tasks such as preparing and cooking of a varied range of foods for patients, staff and internal functions.</td>
</tr>
<tr>
<td>Domestic services managers/ domestic services supervisors/ domestic assistants</td>
<td>• As a member of the domestic services team, you will help keep the hospital environment safe and clean for patients, visitors and staff. In a management role, you’ll plan the work and organise the teams responsible, while as a supervisor you’ll ensure that high standards are met. Assistants are responsible for the day-to-day aspects of the work and usually have a lot of contact with patients.</td>
</tr>
<tr>
<td>Housekeepers</td>
<td>• Housekeepers work with senior nurses to make sure wards are clean, safe and welcoming for patients and visitors. In this role you will see that catering and cleaning meet the demanding standards of the NHS and that the ward equipment is well maintained. Some housekeepers also supervise patient transport and clerical and linen services.</td>
</tr>
<tr>
<td>Laundry managers/assistants</td>
<td>• No hospital can function without a first-class laundry service. It is essential for patients’ comfort and hygiene. Laundry managers ensure that supplies of spotlessly clean linen are available when and where they are needed. Assistants see that the laundry is properly washed and presented, minimising the risk of infection. Many trusts have their linen cleaned by external contractors. This requires staff to monitor and check to ensure that the supply linen is in accordance with standards set by the trust.</td>
</tr>
</tbody>
</table>

---

For more information about roles in domestic services, please see the relevant factsheet or visit [www.nhscareers.nhs.uk/WHT](http://www.nhscareers.nhs.uk/WHT)

To search for jobs, visit [www.jobs.nhs.uk](http://www.jobs.nhs.uk)
Estate services

The NHS has one of the largest property portfolios in the country and has an ongoing programme of new building developments. These can range from the refurbishment of a ward to the building of a new hospital.

Working under the direction of the maintenance or estates manager, many members of staff may have the opportunity to work at different sites. In the roles listed below, you will work on new buildings, and on extensions and repairs to existing buildings.

<table>
<thead>
<tr>
<th>Type of work</th>
<th>Main responsibilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Architects</td>
<td>• As an architect in the NHS, you’ll be involved in designing new buildings and extensions to original buildings and also renovations. Your expertise will be particularly vital when working with the many listed buildings that form part of the NHS estate. An ambitious building programme is currently underway involving some major projects, funded through partnerships between the public and private sectors.</td>
</tr>
<tr>
<td>Building workers</td>
<td>• Skilled building workers employed by the NHS include bricklayers, carpenters, painters and tilers. You might work on interior and exterior maintenance of buildings within the trust, or be employed in the construction of new buildings.</td>
</tr>
<tr>
<td>Caretakers</td>
<td>• As a caretaker you have a range of key responsibilities. These might include disposing of clinical and other waste, moving furniture and equipment as needed, supervising car parks and helping the skilled maintenance team with their work.</td>
</tr>
<tr>
<td>Electricians</td>
<td>• As an electrician in the NHS, you could be involved in construction projects. You will also maintain and repair existing systems and equipment, including complicated lifesaving machinery.</td>
</tr>
<tr>
<td>Engineers</td>
<td>• In this role you will manage hospital maintenance programmes – heating systems for example – and repair important machinery. Increased seniority would bring you the opportunity to design systems or move into estates or operations management.</td>
</tr>
<tr>
<td>Estates managers</td>
<td>• Estates managers are responsible for all aspects of the maintenance of hospital buildings, machinery and grounds. They manage the staff doing the day-to-day work, such as bricklayers and electricians. In this senior role, you will usually have a professional qualification, such as registered architect or chartered engineer.</td>
</tr>
<tr>
<td>Estates technicians</td>
<td>• Estates technicians test and maintain vital specialist equipment, such as sterilisers, fire alarms and intruder alarms. In an emergency, you might be called out to a patient’s home to test or repair an essential medical device.</td>
</tr>
<tr>
<td>Gardeners/grounds staff</td>
<td>• You will help to keep trust grounds green and attractive for patients, visitors and staff. A hospital garden can be a haven for people, particularly at times of sadness or anxiety. You might also be involved in landscape work.</td>
</tr>
<tr>
<td>Plumbers</td>
<td>• As a key member of the skilled construction team, you might install plumbing and heating systems into new building projects. You’ll also help maintain and repair existing systems and equipment, working under the direction of the maintenance or estates manager.</td>
</tr>
<tr>
<td>Surveyors</td>
<td>• As a surveyor your skills will be important when working alongside architects on new building and renovations, in particular on large-scale projects where major capital expenditure is involved. An ambitious building programme is currently underway involving some major projects, funded through partnerships between the public and private sectors.</td>

CASE STUDY

Name: Luke Watson
Job title: nurse cadet, Gateshead NHS Foundation Trust
Entry route: healthcare assistant apprenticeship

Luke loves his role as a nurse cadet because he has a direct influence on a person’s health and he gets to work with a range of healthcare staff.

Initially I was interested in being a paramedic after getting my BTEC National Diploma in Sport and Exercise Sciences, but decided to try and get some healthcare experience. I started a healthcare assistant apprenticeship and worked in A&E for 13 months, which gave me a feel for the health sector. I loved every minute!

I decided to pursue a career in nursing and when a new cadetship course started at the trust, I jumped at the chance to get a place as a way to acquire the necessary qualifications and experience to apply for university. The cadetship has allowed me to gain enough UCAS points to apply for a degree in adult nursing, while keeping my practical skills ‘sharp’.

I have placements in various wards and help with patient mobility, personal care and patients’ individual health needs. I also assist with procedures such as catheter care, monitoring blood pressure, temperature, dietary and fluid intake, and help patients with feeding if they need it.

I help lots of different healthcare professionals with their daily tasks: everyone from nurses, doctors and healthcare assistants to porters. I’ve worked in many different departments and wards around the hospital – medical, haematology, gastroenterology, surgical, orthopaedics, palliative care, and community and day case departments - which means I’ve cared for many different types of patients.

Having a direct influence on a person’s health is very fulfilling and I love watching a person progress and improve from admission to discharge. I build a rapport with both the patients and their families, so we can help improve their health, living environment and social circumstances.

Looking ahead, I hope to qualify and register as an adult nurse and progress up the career ladder to a charge nurse role.

Working in A&E gave me a feel for the health sector. I loved every minute!
Support services

**Drivers**
- Most trusts now have more than one site and some services, such as pathology, are centralised. Drivers transport essential items, such as pathology samples, blood, drugs and equipment between those sites. You might also drive staff and take patients to and from hospital. There are also opportunities for drivers in some national health authorities, to deliver blood and organs and distribute health service supplies.

**Fire safety officers**
- As a fire safety officer, you will advise on safe practice and give regular training sessions to all staff on fire prevention and emergency procedures. You’ll also be responsible for ensuring that electrical and other systems are safe and that no part of the premises represents a fire hazard.

**Porters**
- You will be an important member of the team moving between the different trust buildings and hospital departments. Porters move frail and often very ill people between departments and wards in safety and comfort. In this role you will also transport supplies and materials as well as complicated equipment that needs expert handling.

**Security staff**
- As a member of the security staff, you will ensure that hospitals are safe for patients, visitors and staff. In addition, you will look after valuable equipment, patrol buildings and grounds, monitor CCTV and respond to emergency calls from staff. Your work may include monitoring the security of car parking facilities within the trust.

**Sterile services/decontamination managers/assistants**
- Sterile services/decontamination units have an essential part to play in fighting infection within hospitals. You will be responsible for decontaminating complicated medical equipment, reassembling and repackaging it, ready for use in areas such as operating theatres.

**Storekeepers**
- The NHS relies on a huge range and quantity of supplies and as a storekeeper, you will ensure these supplies are delivered on time to the right wards and departments. You will also stock-take and use computers to keep track of orders. Your job might be based at a regional distribution centre or equipment loan stores.

Clinical support services

As a clinical support worker, you’ll provide vital assistance to healthcare professionals in diagnosing, treating and caring for patients.

Some roles involve close contact with patients, others do not. There is a huge range of opportunities for you to choose from and as you extend your knowledge and skills, you may be able to undertake further training to become a senior healthcare assistant, therapy assistant or an assistant practitioner.

**Type of work** | **Main responsibilities**
--- | ---
**Assistant dietitians** | - Working alongside a registered dietitian, you will help to promote good nutrition. In hospital you will be supporting patients on special diets and in the community you’ll be involved in health education.

**Clinical support workers in dentistry** | - In this role you will play a key part in helping the dental team to treat patients and provide advice. You will work under the supervision of a dentist and/or dental nurse. The job might involve mixing the materials that the dentist uses for filling teeth, assisting with x-rays and sterilising instruments and equipment.
Clinical support services (continued)

<table>

<tr>
<th>Type of work</th>
<th>Main responsibilities</th>
</tr>
</thead>
</table>
| Healthcare science assistants and associates | • Healthcare science assistants support qualified healthcare scientists in using complex, specialist equipment to diagnose, measure and treat a wide range of different conditions. Your exact responsibilities will depend on the area of healthcare science you work in. Here are some examples:  
  – In cardiac sciences, you might operate the electrocardiograph (ECG) machine that monitors the functioning of a patient’s heart in order to diagnose or monitor a heart condition. You’d connect the machine and take readings.  
  – In pathology, you would, under supervision, carry out a wide range of routine technical tasks in a pathology laboratory that might include specimen reception (of samples of blood, other body fluids and tissues from patients being investigated for disease), data entry and other clerical work (preparation and storage), preparation of samples, preparation of reagents for laboratory investigations and using laboratory equipment.  
  – If you work in audiology, you might specialise in checking very young babies’ hearing in order to identify any problems. You will use equipment linked to a computer that produces the results. You’d then ensure that the information reaches the appropriate healthcare staff in your team.  
  – In blood sciences, you might take blood samples from patients (a process called phlebotomy) who are being tested for particular medical conditions or whose progress is being monitored. You would work in a hospital or in a community clinic, and be responsible for labelling samples and ensuring they are delivered to the appropriate laboratory for analysis. |
| Maternity support workers | • This role will give you the chance to be involved in caring for women and their babies through the vital stages of pregnancy, childbirth and the first few days after the birth. In the labour ward, you will help midwives prepare instruments and equipment, and in a maternity ward you’ll assist with caring for mothers and newborn babies. |
| Nursing healthcare assistants | • As a healthcare assistant, you’ll be fully involved in routine nursing care. You might be taking and recording temperatures and blood pressures, helping patients with washing, assisting with feeding and toileting, assisting people who have problems walking. With training, you can undertake extra responsibilities such as taking blood samples and removing catheters. |
| Occupational therapy assistants | • Occupational therapy assistants help support clients with physical, mental or social problems to cope with daily activities, such as shopping or cooking a simple meal. You’ll play a key part in helping people to carry on leading independent lives in their own homes. |
| Physiotherapy assistants | • In this role you will help qualified physiotherapists to rehabilitate patients after an injury, illness or disability. This might involve showing them how to use mobility aids, setting up equipment and working on exercises with them. |
| Podiatry assistants (chiropody or foot-care assistants) | • Podiatry assistants give the more routine foot care and treatment under the supervision of a qualified podiatrist. This includes cutting toenails and applying dressings. You might also do some clerical work, such as booking appointments. |
| Radiography assistants (imaging support workers) | • Working alongside qualified radiographers, you will use techniques such as ultrasound, magnetic resonance imaging (MRI), computer-assisted tomography (CAT scans) as well as x-rays. You will help prepare patients for the procedure and ensure equipment is properly maintained. |
| Speech and language therapy assistants | • This role gives you the opportunity to assist a qualified speech and language therapist to treat patients with a range of different speech and language difficulties. You’ll help and encourage patients to carry out exercises, record their progress and liaise with the therapist about any changes to their treatment. |

Getting started

There is a tremendous variety of opportunity within the NHS wider healthcare team. Whatever role you choose, and whatever level you start at, you will get all the support you need to develop your career.

Values and behaviour
If you decide to work for the NHS, whatever role you come into, you’ll need to show your understanding of the NHS values and behaviours, which are part of the NHS Constitution.

Getting in
Whatever your qualifications and previous experience, you can learn on the job and you can study, if you choose.

Many employers fund special training schemes, known variously as apprenticeships, traineeships or cadet schemes. Sometimes these are in specific areas, such as engineering for example. On other schemes, you move around to gain experience of different work areas. You’ll usually get the chance to work towards national qualifications and, by training while you work in this way, you earn as you learn.

Once qualified, you may get help towards the membership fees of any professional association you may want, or need, to belong to. Your employer will also support your continued professional development and may fund study days as well as further qualifications.

Some employers offer work placements to help you decide what’s right for you. You can find out about these by contacting the human resources department at the trust.

If you wish to develop your career, you will receive support to do so. If you come in at a junior level, enjoy what you do and want to remain in that role, the decision is entirely yours.

Below you will find more information on starting your career in each of the six areas of the wider healthcare team.

Administration
For some administration roles, such as typist or telephonist, you will need certain training for the job. In other roles, such as receptionist, a sympathetic and friendly manner and a willingness to learn might be more important.

Employers sometimes want a formal qualification. However, requirements vary and there is a lot of flexibility.

You might join the NHS as a clerk and go on to become a medical secretary or move across into one of the corporate areas, such as human resources. With further study and ability, you could then progress into management.

Corporate services
There is a wide range of roles in corporate services and it is possible for you to join the NHS at any level. For some of the professional roles, there is a clear training path, leading to a recognised professional qualification. Here, you may have already chosen your career and qualified before opting to join the NHS.

Read more about the NHS Constitution: www.nhscareers.nhs.uk/nhsconstitution
If so, you will come in at a more senior level, either staying within your specialism or moving to other high-level positions within the health service.

Audiovisual technicians need a relevant City and Guilds qualification or the equivalent. However, it is possible to join one of the professional areas in a junior role, in finance, human resources or library services, for example, and to study part-time for qualifications.

There are graduate management training schemes available in human resources, finance, general management and informatics management, but you can also move into an NHS management role without being on one of these schemes.

**Domestic/catering services**

If you have a relevant qualification in cooking, food hygiene, hotel services or cleaning science, you could join as a chef, head chef, department supervisor or manager. However, if you have proven ability and experience it may be accepted instead of formal qualifications.

You could also join as an assistant with no qualifications and then move up into a supervisory or management role. With experience and training you could progress from laundry assistant to laundry services manager or housekeeper, for example.

**Estates services**

For jobs such as architects and surveyors, there is a clear training path, leading to a recognised professional qualification. Here, you may have already chosen your career and qualified before opting to join the NHS.

Some jobs, for example electrician, plumber or carpenter, need a City and Guilds certificate or vocational qualification. You might also need a vocational qualification to be a gardener or member of the grounds staff, depending on your particular employer.

You could start as an unqualified assistant and work towards your craft qualification. Further experience and part-time study could then lead you to a BTEC, HNC/HND or higher-level vocational qualification, which would make you eligible for a post as a technician. You might then set your sights higher – for example, a degree or vocational qualification level 4, and then a postgraduate qualification, which could lead to chartered engineer status (masters degree in engineering or vocational qualification level 5), and a senior post as an estates manager.

**Support services**

As with corporate services, the wide range of positions in support services brings opportunities at all levels. Drivers require experience and an appropriate licence, while fire safety officers are usually former firefighters who have had extra training.

You could work in sterile/decontamination services with no formal qualifications and go on to train as a technician. You might then study for a professional qualification.

For roles such as porter or security officer, formal qualifications are not required, as you will be given training either on or off the job. Many trusts now offer opportunities up to vocational qualification level 2 or 3. Many of these areas of work offer progression into supervisory and management positions, while developing professional qualifications in the appropriate areas. Personal qualities such as a calm, reassuring manner, and a willingness to learn and be part of a team are important.
Stephanie Ferris

Stephanie enjoys the patient interaction in her role as a porter and working as a team with lots of different staff.

I have been working as a porter at the trust for the last six months or so and am learning new things every day. I am also signed up to do an NVQ level 2 in portering and this trust was one of the first to implement the course.

The job’s definitely challenging sometimes, particularly when patients need persuading to go for certain procedures. We have to liaise with other departments to ensure that all the information we have is correct, that the patients are well enough to be transported, and that we’re taking them for the correct procedure at the correct time.

In any one day, I encounter a huge variety of people! It’s very rewarding when my team leader hears from staff and patients to say how pleased they are with the service I’m providing. I get to know the patients and vice versa; just having a chat and a laugh can make them feel better. It makes you feel good to know your hard work is appreciated and that you make a difference to the patients.

If you enjoy meeting different people and can relate to and sympathise with them, NHS portering could be the job for you.

I love meeting the patients and always have their best interests at heart.
Clinical support services
For these roles, personal qualities such as a mature attitude, commitment and motivation are the most important requirements. If you can demonstrate your enthusiasm by having done some relevant voluntary work or work experience then this will help. Some employers ask for a good general level of education, particularly literacy and numeracy skills.

The clinical support worker route is an excellent way for people to work in the clinical and science areas of the NHS without any formal qualifications, and to progress through experience and training, both on and off the job, which could include studying for vocational qualifications or, at more senior levels such as assistant practitioner, a foundation degree. With aptitude and study, it is possible to qualify as a healthcare professional and go even further up the career ladder.

Pay
Most jobs are covered by the Agenda for Change (AfC) pay scales. This pay system covers all staff except doctors, dentists and the most senior managers. The NHS job evaluation system determines a points score, which is used to match jobs to pay bands and determine levels of basic salary. Each pay band has a number of pay points. Staff will normally progress to the next pay point annually, until they reach the top of the pay band.

The wide range of career opportunities in the wider healthcare team is reflected in the pay and rewards available. For example, finance assistants or porters are typically paid at AfC band 1, HR advisers at band 5 with managerial posts attracting higher bandings. Other examples of roles in this work area, with typical pay bands, include medical secretary (bands 3-4), linen/laundry supervisor (band 3) and estate maintenance worker (bands 3-5).

What’s your next step?

We hope this booklet will have given you some idea of the many opportunities on offer in the wider healthcare team.

If you’ve decided you want to work in the wider healthcare team, it’s important to start planning ahead straight away. Find out as much information as you can about the qualifications you need and the opportunities that are available.

If you need a degree, UCAS can advise on which universities offer which courses. Each university will also be able to tell you what they look for in an applicant. For example, getting some work experience is an excellent way of showing your commitment and enthusiasm.

If you are already working but thinking about a change of career, consider volunteering in your spare time. This is a great way to find out if you like the work, and can lead to a more permanent position.

Whatever position you’re in now, the NHS Careers service can help. Call us on 0345 60 60 655, email advice@nhscareers.nhs.uk or visit our website at www.nhscareers.nhs.uk

To find a university course, visit the UCAS website at www.ucas.ac.uk
